TITLE : CAMERA

ABSTRACT : PROBLEM TO BE SOLVED: To provide a camera capable of judging the size of an object, without placing a scale, etc.

SOLUTION: When a scale recording mode for recording a scale image in the picture of a film is selected, the scale image SI for showing length decided by distance information from an AF circuit and the focal distance of a photographic lens is recorded. Therefore, the reproduced scale image SI is compared with the image of a fish F as the object, so that the actual size of the object can be judged.
